It should be pointed out that the above analysis is not meant to be a general statement about the relationship between the two variables. It is only a specific example of how the relationship can be analyzed.

First, some related questions: at what income level do Americans, as a group, begin to feel that the government should take action to help them? And how much action should the government take?

 1

Até 1980, a maioria dos pesquisadores acreditava que a maioria dos indivíduos com síndrome de Tourette e com tiques não apresentava problemas de aprendizagem. Entretanto, a maioria dos estudos realizados desde 1980, com exceção de alguns, demonstrou que os indivíduos com síndrome de Tourette e com tiques apresentam problemas de aprendizagem. Os problemas de aprendizagem são mais comuns em indivíduos com síndrome de Tourette e com tiques quando há comprometimento da inteligência. Quando há comprometimento da inteligência, os problemas de aprendizagem são mais graves e mais numerosos. Quando não há comprometimento da inteligência, os problemas de aprendizagem são menos graves e menos numerosos. Os problemas de aprendizagem são mais comuns em indivíduos com síndrome de Tourette e com tiques quando há comprometimento da inteligência. Quando não há comprometimento da inteligência, os problemas de aprendizagem são menos graves e menos numerosos.

Tenebrae gratia peruenit ad
 portum salutis.

the proposition. As Proposition 1 is the Conjunction of Propositions 1 and 2, it follows that Proposition 1 is true. \square
